PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech CSBS, CGPA 8.70) with hands-on experience in Python, SQL, Power BI and Excel, plus web development. Built end-to-end projects covering data cleaning, EDA, ETL pipelines, KPI dashboards and risk metrics on financial datasets. Seeking entry-level roles in data analytics, business analysis, data operations or Python/SQL development, where I can turn data into clear business insights.

Technical Skills

- **Visualization & BI:**Power BI (DAX, Drill-through, Slicers), Matplotlib, Seaborn, Streamlit, Excel Dashboards
- **Data Analytics:** Python (Pandas, NumPy, SciPy), SQL (MySQL, SQLite), Excel (Pivot Tables, Formulas), EDA, Data Cleaning, Statistics
- **AI & Machine Learning:** TensorFlow, OpenCV, K-Means & Hierarchical Clustering
- **Tools & Technologies:** Git, GitHub, Jupyter Notebook, MySQL Workbench

Internship Experience

Nexgen Technology | Web Development & Python Intern **Dec 2023**

- Completed internships in Python Programming and Web Development under senior developer guidance.
- Developed a functional website, focusing on structure, styling, and responsiveness.

Bluestock Fintech | Data Analyst Intern **Sep 2026 – Oct 2026**

- Working on data analysis tasks for a FinTech company, applying Excel, SQL, Python, and Power BI to analyze sales performance and business metrics.
- Built dashboards and reports covering data cleaning, KPI tracking, and trend analysis using real-world datasets.

Projects

Mutual Fund Analytics & Risk Dashboard | Python, Power BI, Pandas, REST API **2026**

- Ingested live NAV data via API for 40 schemes and built a 4-page Power BI dashboard (Industry Overview, Fund Performance, Investor Analytics, SIP & Market Trends)
- Calculated historical VaR/CVaR and rolling 90-day Sharpe ratios; added investor cohort analysis, SIP continuity checks and sector concentration (HHI).

Decoding Live Malware Actions Using Ensemble Learning Model |Python, TensorFlow, CNN, OpenCV **2026**

- Converted malware binaries into grayscale images (byte-to-pixel mapping) to visualize structural patterns across 25+ malware families.
- Designed and trained a CNN (convolution, pooling, dense layers) achieving 94.47% classification accuracy, using a train/validation split to control overfitting.

Education

SRM Institute of Science and Technology, Chennai **May 2026**
B.Tech in Computer Science and Business Systems– CGPA: 8.70/10

Amalorpavam Higher Secondary School, Pondicherry **May 2022**
12th Grade – 80.5%

Certifications & Training

- Data Analytics with Generative AI — NIIT
- Certified Responsive Web Design Developer on FreeCodeCamp
- Completed a course on JavaScript with HTML at SRM IST
- Completed Deloitte Australia – Data Analytics program on Forage
